

4 Site Selection and Alternative Application Site Configurations

4.1.1 The assessment of the site selection is contained in Chapter 4, "Site Selection and Alternative Application Site Configurations" in the Environmental Statement dated September 2007 and the documents submitted as part of the Further Information submission listed below:

FI 2. Supplementary freight, rail and demand report, MDS Transmodal, September 2008

FI 11. Supplementary Information on Other Sites Assessment, RPS, June 2008

4.1.2 The scheme change shown in the revised Parameter Plans contained within the Supplemental ES does not require any further assessment of site selection and alternative sites. No part of Chapter 4 of the September 2007 ES, the September 2008 Supplementary freight, rail and demand report or the June 2008 Supplementary Information on Other Sites Assessment is therefore superseded.
