

Maidstone Borough Council Planning Search Guidance

This application may require pop-ups enabled, as shown in the image below.

For users behind firewalls, please note: If you wish to view the planning search pages from behind a corporate or personal firewall you may experience difficulty viewing the pages. We are currently working on a solution.

Measuring Tool

A measuring tool for the purposes of measuring plans is now running on our website. This means that plans can be accurately scaled without needing to print them off. In order to use the tool you will need the latest version of [Adobe Reader](#) and to follow [these instructions](#).

*Please note that representations made on a planning application go onto a publicly available file, either 5 working days before the application goes to Planning Committee or after a decision is made (whichever is the sooner). This includes name and address details.
